

Sanity Check Automation — Complete Flow

Trigger

User clicks "Run Sanity Check" on dashboard (localhost:5000) OR daily 5 PM scheduler

PHASE 0: Load Merchant Data Google Sheets API

- 0.1 Read "**Manish sanity**" sheet → Merchant names, EB MID, Expected rates (UPI/CC/DC)
- 0.2 Read "**Salt n key**" sheet → Expected KEY + SALT per merchant
- 0.3 Read "**Auto Check**" tracker → Current check status

PHASE 1: Easebuzz Partner Portal Browser Automation

URL: partners.easebuzz.in

- 1.1 Login → Email/Password from .env
- 1.2 Navigate: Custom Reports → Merchant Settlements
- 1.3 Click "Generate New Report" → Fill form (All merchants, last 30 days)
- 1.4 Wait 60-90s for report generation
- 1.5 Download CSV → settlement_report.csv

Per-Merchant Checks (1-3)

1 Settlement

Source:
settlement_report.csv

Logic:
Filter by EB MID → count transactions + amount

PASS: Active WARN: No txns

2 MDR

Formula:
 $(\text{Service Charge} / \text{Amount}) \times 100$

Compare:
Actual vs Expected from sheet

PASS: Match ($\pm 0.05\%$) FAIL: Mismatch

3 Account Number

EB Account:
settlement_report.csv

Cheque:
[Drive OCR](#) Tesseract → regex

PASS: Match FAIL: Mismatch (fraud!)

PHASE 2: GoKwik Dashboard Browser Automation

URL: dashboard.gokwik.co

- 2.1 Login → Email/Password from .env

2.2 OTP auto-fetch Gmail IMAP → Extract 6-digit from "GoKwik Signin" email

2.3 Navigate: Kwik Payment → Settings → Terminals

✔ Per-Merchant Checks (4-5)

4 SALT & KEY

Steps:

1. Switch merchant (dropdown)
2. Navigate Terminals again
3. Click Edit on Easebuzz
4. Extract KEY + SALT from form
5. Compare with "Salt n key" sheet

PASS: Match FAIL: Mismatch

5 VPA / Webhook

Steps:

1. Click Orders in sidebar
2. Open first order (KWIK...)
3. Find Payment → Link column
4. Parse upi://pay?pa= . . .
5. Check merchant name in VPA

PASS: VPA valid WARN: No orders

📋 PHASE 3: Results

3.1 Aggregate: Overall = PASS / FAIL / WARN per merchant

3.2 Display on dashboard (localhost:5000 → Results tab)

3.3 Write back to "Auto Check" sheet

3.4 Export: PDF / CSV / Email Draft for discrepancies

3.5 Daily 5 PM automatic run via APScheduler

📖 Data Sources Summary

Google Sheets API "Manish sanity" — Merchant list + Expected MDR rates

Google Sheets API "Salt n key" — Expected SALT & KEY per merchant

Google Sheets API "Auto Check" — Tracker (results written here)

Browser partners.easebuzz.in — Settlement Report (actual txn data)

Browser dashboard.gokwik.co — Production SALT/KEY + VPA from orders

Drive API Cancelled Cheque folder — Bank account via OCR

Gmail IMAP paymentsops@gokwik.co — Auto OTP fetch

🎯 Why Each Check?

1. Settlement

Verify settlements are actually happening

2. MDR

Ensure correct rates are charged (commercial team validation)

3. Account Number

4. SALT & KEY

Detect fraud — wrong bank = money going to wrong person

Ensure production config matches agreed credentials

5. VPA / Webhook

Verify payment routing — merchant's UPI ID correctness
